

PHOENIX CLUB

The aim is to make the students aware of the recent trends and developments in the area of Computer Science & Engineering. It arranges expert talks in the domain of Computer Science & Engineering. Various Cultural events will be organized under the event. Skill development program also will be part of an event. Various Industrial Visits will be organized under the club.

OBJECTIVES OF THE CLUB:

- To develop Personality and skills in students.
- To provide exposure to students regarding real world project development skills.
- To organize cultural and technical programs.

CODE-RANGER CLUB

The Code-Ranger club aims at enhancing the technical skills of the students by organizing technical events in the Chandigarh Group of Colleges. The aim is to make the students aware of the recent trends and developments in the area of Computer Science & Engineering. It arranges expert talks in the domain of Computer Science & Engineering. It arranges technical workshops/Seminars and events. Motive of Code Rangers Club is to Improve College coding ranking on HackerEarth like platforms.

OBJECTIVES OF THE CLUB:

- To develop coding skills in students.
- To provide industry exposure to students regarding real world project development skills.
- To provide knowledge on Current technical topics and various hands-on real world problem solutions.

FUSION CLUB

The main target of the club formation is to check the competency of the students in the field of coding, designing and other allied sectors. It is also anticipated that the club will act a catalyst for the students of other branches also to make the multidisciplinary projects. The club will make efforts to bring the experts of the relevant and new fields so that new ideas and expertise could be shared with the students.

OBJECTIVES OF THE CLUB:

Although not limited to but the kinds of activities planned under this club will be as follows:

- Team collaborated projects in various fields.
- Participation in hackathons like events and other online competitions.
- Organizing the workshops to spread technical awareness about new areas.
- Organizing the code formation competitions/events.
- Guidance to students to learn new technical skills in the form of expert lectures.
- Create awareness about IoT/Blockchain/cyber security and to work upon these areas and many more.
